

The Tunisian elite network: individuals, the organisations they own and govern, and their families

37,855 entities and 41,791 ties, 1957–2026, of which the largest connected component (23,808 entities, 63%) is drawn. Every node is one individual or one organisation — nothing is aggregated. Node area $\propto$ ties.

Ties admitted

- 1 · shares or board seat — 8,434 ties
- 2 · family — 13 ties
- 3 · association board, party organ — 964 ties
- 4 · government and parliament — 293 ties
- 5 · organisation owns organisation — 1,792 ties
- 6 · seed file — 30,295 ties

Excluded: 5,438 gazette ties whose holder is a government employee below the government, parliament and board — chef de service, sous-directeur, secrétaire général, directeur général, conseiller, représentant, and the state offices whose rank is never stated. Also excluded: auditors and liquidators, and chief executives not stated to sit on a board.

Source: Journal Officiel de la République Tunisienne 1957–2026 (jort.tn), the Registre National des Entreprises, and a 13,630-name elite roster. Author's extraction.

A SARL's gérant counts as a governing-body seat, because a SARL has no board and the gérant is its governing organ; a chief executive not stated to sit on a board does not count.

Individuals outside the 13,630-name roster are mention clusters, so one node can be several namesakes — see docs/PROJECTION-multiplex.md.
