

Forest Plot: Hierarchical Glass Ceiling Odds Across Regimes

Adjusted Odds Ratio (OR) of female attainment of senior leadership ranks (OR $\pm$ 95% CI)

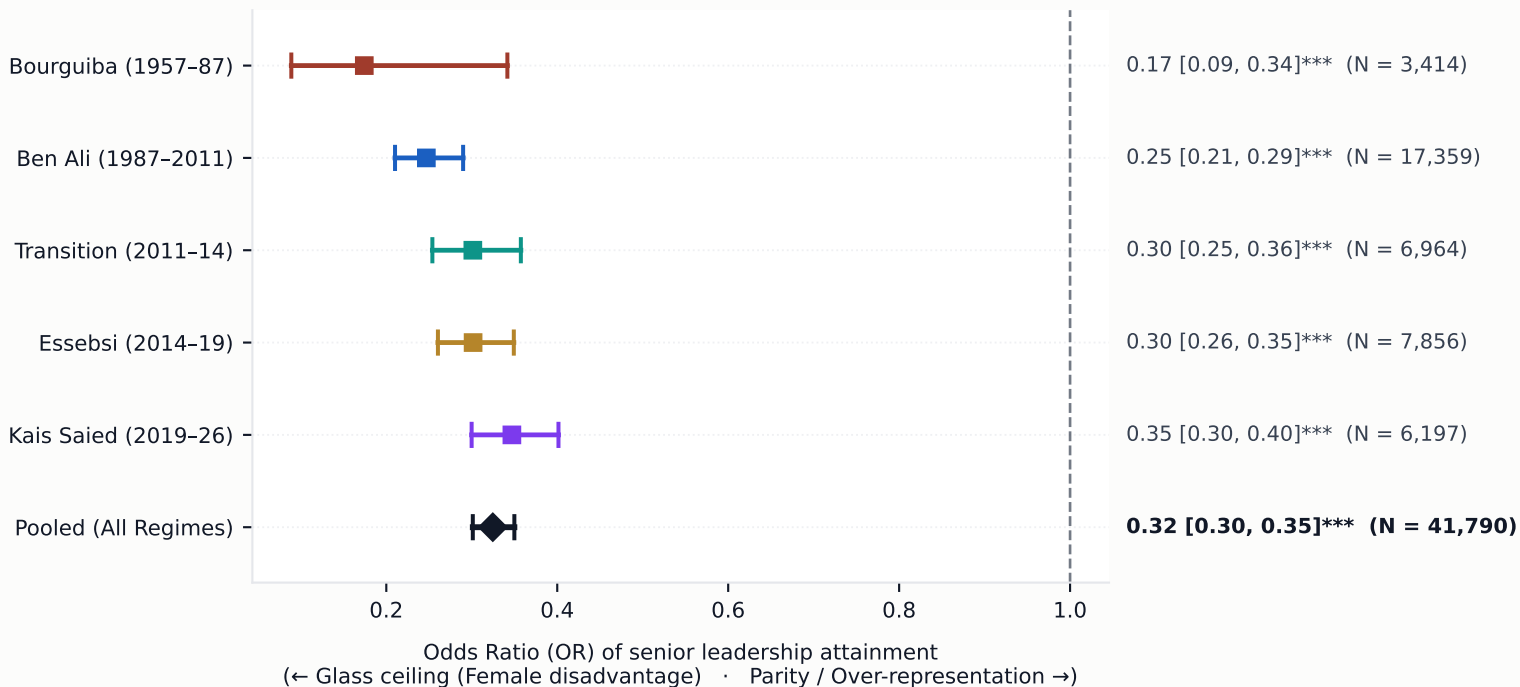

Figure 14b: Forest plot of the hierarchical glass ceiling odds ratios across political regimes.

Notes: Points and horizontal error bars display the adjusted odds ratio (OR) of female civil servants reaching senior leadership positions (Secretary General, Director General, Cabinet Chief) versus entry-level cadres (95% CIs). The vertical dashed reference line at 1.0 denotes equal odds; values below 1.0 document an entrenched glass ceiling. Total sample N = 41,790 spells.
